# LORENZO BOLLA

SENIOR SOFTWARE ARCHITECT

[lbolla@gmail.com](mailto:lbolla@gmail.com)

+44 (0)7786 189 180

---

## Profile

Software Engineer with background in Physics and a crush for hard (yet) unsolved problems.

Telecommunication Engineer with a strong mathematical and physical background, specifically in the field of classical optics and telecommunications.

Doctorate on Numerical Methods and proved abilities to develop complex algorithms efficiently, in both academic and business environments.

5+ years of experience in software design: highly scalable web applications, numerical intensive simulations and massively parallel data analysis.

Fluent in Python, Javascript, HTML, CSS, C/C++ (using both STL and Boost libraries), Fortran and Matlab.

Interested in other programming languages, like Haskell, Lisp and Go.

Experienced with many different libraries and frameworks: Tornado, Pandas, Disco, JQuery, ExtJS, git, MySQL, sqlite, MongoDB, nginx, and many more.

Familiar with UNIX-like (mainly Linux) and Windows OSes.

Logical thinker, able to provide effective solutions to solve difficult problems.

Great team-player & fun attitude, competent time manager, very dependable under pressure and passionately dedicated to the task.

---

## Skills

### Software Architecture

Proved experience in designing, implementing and deploying highly scalable software systems.

### Software Development

Years of experience in [Python](#) development, using [Tornado](#), [Pandas](#), [MySQL](#), [MongoDB](#) and many other tools. Very interested in functional programming, especially [Haskell](#).

### More

[Github](#)

[StackOverflow](#)

[LinkedIn](#)

---

## Technical

Python

Javascript

MySQL

Haskell

JQuery

SQLite

Go

HTML/CSS

MongoDB

C/C++

ExtJS

Memcache

---

## Experience

### [RAID Research Services LLP](#)

May 2012 - now

Senior Software Architect

Design and implement scalable analysis software for finance using mainly *Python*, *Pandas*, *MySQL* and *ExtJS*.

Implementation of an in-memory DB to efficiently query tabular data.

Parsing of unstructured data sources and categorization using simple machine learning techniques.

---

### Artirix Ltd

Senior Software Engineer

April 2012 - May 2012

Design and implementation of highly scalable web search crawlers using *Python* and *Twisted*.

---

### Zugo Ltd

Senior Python Developer

April 2011 - April 2012

Develop massively scalable web applications (using *Tornado*, *MySQL*, *MongoDB*, *nginx* on the back-end and *HTML*, *Javascript*, *CSS* on the front-end).

Experience in distributed data analysis using *MapReduce* frameworks (mainly *Disco*), *NoSQL* data stores (mainly *MongoDB*) and *AWS* solutions.

Some experience in browser extension implementation (*Firefox* and *Chrome*).

---

### Geneity Ltd

Software Engineer

August 2008 - April 2011

Software engineer of high-performance E-gaming web applications (mainly working with Betfair, Coral, Ladbrokes and others betting companies).

Focus on high performance fund transfers (maximizing the transaction per seconds supported by the systems), application reliability (maximizing uptime), third-party usability (implementing REST and SOAP access to web applications).

Programming languages used: *Python* (2.5, 2.6), *C*, *PL/SQL* (Oracle 10g-11) for the back-end;

*HTML/Javascript* for the front-end.

OS used: *Linux* (Debian, Suse and ArchLinux distributions).

---

### Pirelli & C SpA

Optical Designer

June 2005 - August 2008

R&D in Photonic Integrated Circuits mainly based on Silicon-on-Insulator technology (SOI-PICs).

Responsible for the design of optical components for metro and access networks, with a focus on innovative solutions.

Excellent problem solving capabilities, lateral thinking and self management.

Deep experience on efficient numerical and parallel programming (SGI Altix hardware), using *C/C++*, *Fortran*, *Matlab*, *Python* languages and *OpenMP*, *MPI*, *STL* and *Boost* libraries.

Experience in patenting.

---

### TELE System Electronic Srl

Software Engineer

March 2005 - June 2005

Consultant on hardware and software design for digital television broadcasting, including theory on transmission algorithms and computer simulations of the complete system.

Experience in programming applications for set-top-boxes, in *JAVA*.

---

### Photon Design Ltd

Software Engineer

April 2003 - April 2004

R&D on numerical algorithms applied to the solution of electromagnetic problems.

Very deep focus on algorithms' efficiency for computationally intensive simulations. Theoretical studies on linear algebra problems, finite difference and finite elements algorithms, modal expansion techniques.

Deep experience in *C/C++* programming, both with *VC++* and *Borland* suites (along with *STL* and *Boost* libraries) and *Python* as scripting language. Basics of GUI programming.

---

## Progetto Mantegna

May 2001 - April 2003

### Technical Support

Technical assistance in the virtual reconstruction of Mantegna's paintings in the Ovetari's Chapel, Padua Italy.

Basics of image analysis and manipulation.

---

## Education

### University of Udine - Italy

November 2002 - November 2005

#### PhD

Thesis on the numerical solution Maxwell equations in periodic dielectric devices.

---

### European Project

September 2004 - June 2005

FUNFOX (Project No. 004582)

Research on semiconductor optoelectronic devices for metro core and access segments in optical networks.

---

### European Project

November 2002 - April 2003

PICCO (IST-1999-10361)

Research in Optical integrated circuits, photonic crystal planar waveguides and wavelength dependent devices.

---

### University of Padova - Italy

September 1996 - March 2002

Laurea in Telecommunication Engineer

---

## Publications

### Books

Technical reviewer for '[Numpy 1.5 Beginners Guide](#)', PacktPub

---
